Initialise loop variables
S12
S13
Idling state ?
Yes
return
S11
No
S14
Initilisation state ?
Yes
S15
initialise focus variables
No
S15
Running state ?
Yes
S20
measure current focus FOM
S21
new FOM better than previous ones ?
Yes
S22
update best_FOM; update best posn;
No
workout next position to try
S23
No
S24
Flyback state ?
Yes
S25
initialise position
No
S26
Track focus state ?
Yes
set large number of frames to be done
S27
increment # of frames measured
S16
S17
done all frames ?
No
Yes
No
go to Idling state; return
S28
go to next state
S18
Focus at position currpos; return
